44 Years Later – Water Quality Section is Needed!
Biological, chemical, and physical connections—such as the hydrologic connections shown here—link streams and wetlands to downstream waters. These connections are critically important for the functioning of watersheds and the fish they support.

EPA’s proposed changes to Section 401 Water Quality Certifications excellent infographic above illustrates the implications of the policy changes. AFS, as part of a larger Consortium of Aquatic Science Societies has formulated a comment in response to these changes with help from Bob Hughes (WQS) and others.
